

AMAN PAREEK

Senior Frontend Engineer

+91-9942405711 amanprk4@gmail.com amanpareek.com linkedin.com/in/aman-pareek-9b8942169 Bengaluru, India

SUMMARY

Senior Frontend Engineer with 7 years of experience building scalable, high-performance web applications across AdTech, Alexa Smart Home, and enterprise SaaS platforms. Specialised in Angular, React, TypeScript, frontend architecture, design systems, and performance optimisation. Experienced in leading frontend migrations, building reusable UI platforms, and delivering AI-powered user experiences at scale across Uber, Amazon, and Zeotap. Also experienced in architecting and shipping full-stack mobile products across iOS, Android, and Web using React Native, Expo, Supabase, PostgreSQL, and AI-powered backend services.

EXPERIENCE

Front-End Engineer II

Uber 04/2026 - Present Bengaluru, India

- Built forecasting and audience estimation workflows for Uber Ads Manager using React, TypeScript, and internal UI frameworks.
- Developed reusable UI components and design patterns adopted across multiple Ads platform modules.
- Improved rendering performance and responsiveness for high-volume campaign and forecasting datasets.
- Partnered with product, design, backend, and ML teams across geographies to drive frontend architecture and product decisions.
- Tech:** React, TypeScript, Redux Toolkit

Front-End Engineer II

Amazon 08/2025 - 04/2026 Bengaluru, India

- Optimised Alexa Smart Home widgets for low-memory Android devices, reducing APK footprint by 75%.
- Built reusable, accessible frontend components compliant with WCAG standards.
- Improved rendering performance and responsiveness for Smart Home experiences used by millions of customers.
- Delivered performance-critical UI flows under strict memory and latency constraints.
- Collaborated with distributed teams to scale Smart Home experiences across international markets.
- Tech:** React, Accessibility, Performance Optimisation

Senior Software Engineer

Zeotap 12/2021 - 08/2025 Bengaluru, India

- Spearheaded migration of enterprise applications to Angular 17, improving maintainability and enabling Signals adoption.
- Designed and implemented a Backend-for-Frontend layer to simplify frontend integrations and API orchestration.
- Built a reusable query-builder UI library adopted across multiple enterprise products, accelerating feature development by 30%.
- Developed AI-powered audience segmentation experiences, increasing customer engagement by 15%.
- Led Nx monorepo migration and introduced Tailwind CSS to improve scalability and UI consistency.
- Mentored engineers and interns and successfully onboarded 5+ team members.
- Tech:** Angular 17, TypeScript, RxJS, Signals, Nx, Tailwind CSS, Node.js

SKILLS

Frontend & Mobile

Angular • React • React Native • Expo • TypeScript • RxJS • Signals • NgRx • Redux Toolkit • Tailwind CSS • Next.js

Architecture & Performance

Frontend Architecture • Design Systems • Nx Monorepos • TanStack Query • Lazy Loading • Code Splitting • Web Vitals • Lighthouse • Accessibility (WCAG)

Backend & Data

Node.js • NestJS • Supabase • PostgreSQL • REST APIs • Edge Functions • Realtime • Row Level Security (RLS) • OAuth2 • JWT

Testing & Delivery

Jest • Cypress • Playwright • Storybook • GitHub Actions • EAS • Jenkins • Docker

Collaboration & Design

Git • Jira • Figma • Agile • Confluence • Sprint Planning • Code Reviews

KEY ACHIEVEMENTS

Frontend Performance

Reduced application load times by **40%** across eight enterprise applications.

Mobile Optimisation

Reduced Alexa Smart Home APK footprint by **75%** for low-memory Android devices.

Platform Engineering

Built a reusable enterprise UI library that accelerated feature development by **30%**.

AI Product Impact

Delivered AI-powered audience segmentation experiences that increased customer engagement by **15%**.

EXPERIENCE

Software Engineer

Tredence 07/2019 - 12/2021 Bengaluru, India

- Delivered 8+ enterprise web applications from product requirements through production deployment.
- Led frontend performance optimisation initiatives, reducing application load times by 40%.
- Built client-facing dashboards and workflows that improved operational decision-making efficiency by 50%.
- Collaborated with product stakeholders and cross-functional engineering teams to streamline complex enterprise workflows.
- **Tech:** Angular, RxJS, Node.js, Express.js, MySQL

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Vellore Institute of Technology, Vellore, India

05/2015 - 05/2019 CGPA 8.44 / 10.00

PROJECTS

Roam.io: Plan Trips Together

08/2026 - Present <https://roamioplanner.com/>

Founder & Full-Stack Engineer

- Architected and built a cross-platform travel-planning product for iOS, Android, and Web using React Native, Expo Router, TypeScript, Supabase, and PostgreSQL.
- Designed secure multi-city planning and real-time collaboration with editor/viewer permissions, invitations, messaging, tasks, PostgreSQL RLS, RPCs, and Supabase Realtime.
- Built an AI-powered itinerary-planning platform using OpenAI and server-side Edge Functions with usage credits, rate controls, and configurable AI availability and budget safeguards.
- Developed Tribe, an authenticated travel community with posts, private media, comments, likes, location discovery, and reusable privacy-sanitized itineraries.
- Implemented production capabilities including authentication, push notifications, private storage, analytics, 6-language localization with Arabic RTL, automated testing, and EAS deployment pipelines.
- **Tech:** React Native · Expo · TypeScript · Supabase · PostgreSQL · TanStack Query · OpenAI
