linkedin.com/in/aman-pareek-9b8942169 Bengaluru, India

SUMMARY

Senior Frontend Engineer with 7 years of experience building scalable, high-performance web applications across Adtech, Alexa Smart Home, and enterprise SaaS platforms. Specialised in Angular, React, frontend architecture, design systems, and performance optimisation. Experienced in leading frontend migrations, building reusable UI platforms, and delivering AI-powered user experiences at scale across Uber, Amazon, and Zeotap

EXPERIENCE

Front-End Engineer II

- Uber 04/2026 - Present Bengaluru, India
- Built forecasting and audience estimation workflows for Uber Ads Manager using React, TypeScript, and internal UI frameworks
 - Developed reusable UI components and internal design patterns used across multiple Ads platform modules
 - Improved dashboard responsiveness and rendering performance for high-volume campaign datasets
 - Collaborated with product, design, backend, and ML teams across geographies to drive frontend architecture decisions
 - Tech:** React, TypeScript, Redux Toolkit

Front-End Engineer II

- Amazon 08/2025 - 04/2026 Bengaluru, India
- Optimised Alexa Smart Home widgets for low-memory Android devices, reducing APK footprint by 75%
 - Built reusable and accessible frontend components compliant with WCAG standards
 - Improved rendering performance and responsiveness for Smart Home experiences used by millions of customers
 - Collaborated with distributed global teams to scale Smart Home experiences across international markets
 - Worked on performance-critical frontend flows under strict memory and latency constraints
 - Took ownership of frontend deliverables across Smart Home widget experiences and performance-critical UI flows
 - Tech:** React, Accessibility, Performance Optimisation

Senior Software Engineer

- Zeotap 12/2021 - 08/2025 Bengaluru, India
- Spearheaded Angular migration to v17, improving performance and enabling Signals adoption
 - Designed and implemented a Backend-for-Frontend (BFF) layer to simplify frontend integrations
 - Built a reusable query builder UI library used across multiple enterprise products, accelerating feature development by 30%
 - Developed AI-powered audience segmentation features, increasing customer engagement by 15%
 - Led Nx monorepo migration and introduced Tailwind CSS for improved UI consistency
 - Mentored engineers and interns, onboarding 5+ team members successfully
 - Tech:** Angular 17, RxJS, Signals, Nx, Tailwind CSS, Node.js

KEY ACHIEVEMENTS

- Frontend Optimisation Success**
Reduced load times by 40%, enhancing user experience on eight web applications.
- Audience Engagement Boost**
Increased customer engagement by 15% through AI-powered audience segmentation.
- APK Size Reduction**
Cut APK footprint by 75%, optimizing for low-memory Android devices on Alexa.
- UI Library Innovation**
Accelerated feature development by 30% with a reusable UI library at Zeotap.

SKILLS

Frontend

Angular	React	TypeScript	RxJS
Signals	NgRx	Redux Toolkit	
Tailwind CSS	Next.js		

Architecture & Performance

Nx Monorepos	Design Systems	
Lazy Loading	Code Splitting	Web Vitals
Lighthouse	Accessibility (WCAG)	

Backend & APIs

Node.js	NestJS	REST APIs	OAuth2
JWT	Firebase		

Testing & Quality

Jest	Cypress	Playwright	Storybook
GitHub Actions	Jenkins	Docker	

Collaboration & Design

Git	Jira	Figma	Agile	Confluence
Sprint Planning	Code Reviews			

EXPERIENCE

Software Engineer

- Tredence

07/2019 - 12/2021

Bengaluru, India
- Delivered 8+ enterprise web applications from planning to deployment
 - Led frontend performance optimisation initiatives, reducing load times by 40%
 - Built client-facing dashboards and workflows, improving operational decision-making by 50%
 - Collaborated with stakeholders and cross-functional teams to streamline enterprise workflows
 - **Tech:** Angular, RxJS, Node.js, Express.js, MySQL.

EDUCATION

- Bachelor of Technology in Electronics and Communication Engineering

Vellore Institute of Technology, Vellore, India

05/2015 - 05/2019
- CGPA

8.44 / 10.00

PROJECTS

Trip Planner

- 05/2025 - Present
- https://amanpareek.com/home
- Built an AI-powered travel itinerary platform using Angular, OpenAI APIs, and ngx-markdown
 - Implemented markdown rendering, dynamic itinerary generation, cost estimation, and experience-based recommendations
 - Designed a frontend-only BYOK architecture without backend dependency
 - Integrated AI-generated itineraries with structured markdown rendering and dynamic UI sections

Portfolio Website

- 01/2024 - Present
- https://amanpareek.com/home
- Built a personal portfolio using Angular and Tailwind CSS showcasing projects, frontend experiments, blogs, and interactive widgets. Implemented lazy loading, dynamic routing, and performance optimisation techniques for improved Lighthouse scores
